

# MovieMATCH™

Projection Confirmation System

## The right movie in the right place at the right time

Give your theatre an advantage with MovieMATCH—an integrated LED solution that confirms show title and start times in each auditorium. MovieMATCH notifies the projectionist when to switch movies to play in a particular auditorium based on the number of tickets sold and each auditorium's seating capacity. It directly interfaces with your POS ticketing system, providing real-time updates of show titles and corresponding start times for your projectionist to view.

MovieMATCH saves time and money by eliminating the need to print out show schedules for projectionists to update and manage.

Each display can hold up to twenty characters for clear movie identification. It is easily installed as a retro-fit or as an add-on to existing LED signage.

## Features & Benefits

- Directly interfaces with your existing POS ticketing system for real-time updates of show title and corresponding show time
- 20-character LED display lists movie title and show time near each projector
- Helps projectionist confirm correct movie and start time for each auditorium
- Eliminates the need to update and print out show schedules.
- Easy to install as a retrofit or as a simple add-on to existing LED signs.
